- Removes organic soiling
- Keeps on working after application
- Less work required
- Harnessing the power of Nature
- Naturally biodegradable

5 Litres FK-BIOS605
750mls FK-BIOS6750

Directions:

Bio-Stain Go is ready-to-use. DO NOT DILUTE.

Carpets, Rugs, Mats, Soft Furnishings: First, determine the cause of the stain - ensure it is from a natural/organic source such as food, fruit juice, vegetable oils, starches, body-soiling. Spray the stain directly with a foam-spray head (undiluted) and allow 10-15 minutes to work, gently working into the area to ensure the formulation gets to as much soiling as possible and works its way into all stained areas. Pat out with a damp clean sponge after 10-15 mins. Check results when dry, repeat if required, or finish using an extraction carpet machine.

Fabrics: Launder normally after application, as per the fabric washing instructions.

Bio-Stain Gone is pH neutral and when applied as directed should not cause staining or damage to most modern fabrics and soft surfaces. ALWAYS follow the supplier or manufacturers instructions and check on an inconspicuous area first to ensure compatibility, especially with any sensitive or non-colour fast fabrics and carpets.

LAUNDRY & CARPET STAIN REMOVER
Use product UNDILUTED

Food Plants: Bio-Fresh products are designed to rid areas of typical plate count problems; floor and other wider environmental areas are not likely to have swabs / plate count results compromised. All MPI facility-based operators should rinse prior to swabbing.

How it Works

Bio-Fresh cleaners contain naturally occurring non-pathogenic microbes.
