

FP11**Kemsol****FOAM-FORCE****PRODUCT INFORMATION****HIGHLY VISCOUS****HIGH STRENGTH****CHLORINATED FORMULATION****EFFECTIVE PATHOGEN CONTROL****GREATER SURFACE CONTACT TIME****CONTROLLED MANUAL DOSING****Hi-Strength Foaming Cleaner & Sanitiser**

High-strength plant foaming cleaner and hypochlorite based sanitiser. Best applied through automatic dilution control equipment or a centralised foaming operation for cleaning large plant and equipment areas, typical in food process operations. If used manually, treat with extreme care. See precaution panel.

DIRECTIONS

For most general food plant foaming applications connect to foaming unit and adjust air/water pressure and detergent feed until the desired foam density is achieved. Cover surfaces and equipment with foam and allow 5-10 minutes for a full sanitising process to take effect.

For manual cleaning use at a ratio of 1:99 to 1:49 (1-2% soln, 10-20mls per litre) with potable water. Not for use on aluminium or soft metals as corrosion or oxidation may quickly occur.

A 1% solution yields 450 ppm of Free Available Chlorine (when product packed).

GOOD PRACTICE

Under Good Practice Protocol based on accepted international research a 2% solution of this product diluted with potable water is recommended with liberal application on clean hard surfaces with a minimum contact time of 5 minutes. At this concentration the product provides 600PPM FAC.

MPI APPROVAL

MPI APPROVED C38 (All animal product except dairy).

This may be used for cleaning large processing rooms provided the room can be divided into distinct areas, no edible product or packaging material is present in the area during cleaning and there can be no possibility of contamination of product or packaging material as a result of cleaning. After using this compound, food contact surfaces must be thoroughly rinsed with potable water before production starts.

ASURE QUALITY ASSESSMENT

Passed AsureQuality assessment for food / beverage / dairy factory non-CIP food contact surfaces - H3253 with conditions.

INDUSTRIAL Environmental Plant foaming cleaner/sanitiser

GENERAL High power spot cleaner/sanitiser

PROPERTIES

APPEARANCE	Clear Slightly Yellow Liquid
FRAGRANCE	Chlorine
STRENGTH	Potassium Hydroxide 100 - 250 g/l and Sodium Hypochlorite 15% soln 300 ml/l
SPECIFIC GRAVITY	1.22
PH	12.5 (1% w/v solution)
MICROCID	450ppm F.A.C. (@1% soln)

**REORDER**

5 Litres	FK-FOAFO05
20 Litres	FK-FOAFO20
200 Litres	FK-FOAFO200

CHEMICAL SOLUTIONS SUSTAINABILITY POLICY

We are committed to continuous improvement in our environmental performance, and have established a number of goals and initiatives that we continue to implement to achieve this objective. Where possible we always use biodegradable raw materials and all our finished product packaging is reusable or recyclable.

This is only a start, we will be continually strive to better our environmental performance.
